

USE THE INTERNET TO ENHANCE YOUR FAMILY LAW PRACTICE

A family lawyer's research often involves locating assets or other information that their client's soon-to-be ex-spouse is trying to keep secret. Despite that spouse's best efforts, there may still be a paper trail – or more precisely a cyber trail – of information that leads directly to that information. The trick is knowing how to uncover it.

Nationally recognized Internet trainers and authors of "How to Use the Internet for Legal & Investigative Research" and "The Lawyers Guide to Fact Finding on the Internet," Carole Levitt and Mark Rosch, will show you how to be your own detective and unearth this information FREE (or at low cost!) on the Net. Instead of first turning to experts, consultants, skip tracers and private investigators, seminar attendees will quickly learn super search strategies to conduct their own investigative research on the Internet.
