

## SUPER SEARCH ENGINE STRATEGIES FOR THE LEGAL PROFESSIONAL

Attendees will learn how the Internet is changing the way they need to research in order to competently represent their clients – and to avoid ethical or malpractice issues!

Do lawyers have a duty to Google? In a recent decision, the court was incredulous that plaintiff failed to "google" the missing defendant as part of his due diligence process and upheld the defendant's claim of insufficient service of process. Effective Internet searching may now need to become part of every lawyer's due diligence routine. At this seminar, attendees will learn the best research strategies (including advanced search features at Google and other search engines) that will assist them in meeting their research obligations.

"The standard of care imposing liability on lawyers for legal malpractice is changing owing to the increasing use of computers. Internet accessibility is about to profoundly change our research obligations...vast amounts of information are readily available to everyone, including courts and clients...." *ABA GP Solo Newsletter*
