

## ***Private Company Listings and Credit Reports for U.S. and Foreign Companies***

### **D & B**

<http://www.dnb.com/us>

*Purpose:* To find contact information for 79 million private companies from 214 countries, and to order various business and credit reports.

*Content:* Search by company name and state (both are required) and the results will show a list of companies with that name. Each entry provides the company's address, phone number, and business entity type (single location, branch, or headquarters). The comprehensive report shows the background of each executive (and even includes names of their former companies), an executive summary about the company, a credit score, financials, and details about judgments, liens, UCCs, bankruptcies, suits, and so on.

*Our View:* This site adds one more crucial piece of contact information not available at the D & B Zapdata site: a phone number. This site also offers more-detailed reports than the \$5 Zapdata report. Order a comprehensive report for \$117 or a credit report for \$54 (various other reports are also available).

**TIP**

- If you don't know in which state the company is located, use Zapdata, which allows for a nationwide search.
- Click on **See Sample** to get a good idea of what type of information each D & B report offers.
